Upper Delaware River

Finally, we got some winter smallmouth fishing in on the Big D Monday. Water temps are in the mid-30's and water had a light stain. We caught 4 smallies and 2 walleye from classic wintering areas. The trick was timing. All bites came between Noon and 1pm, when the sun was at its highest point in the winter sky. Bass ate tubes as well as a new and upcoming BWA exclusive worm we were field testing. More to come on the new hot winter worms!
